Scuola Secondaria di 1° Grado «Maurizio Quadrio»

Piazza Senatore Libero Della Briotta

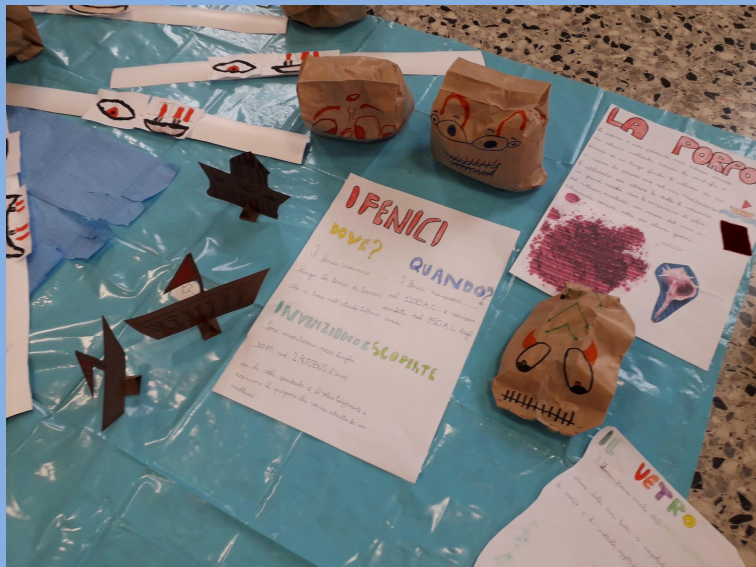

Ponte in Valtellina

Sondrio Italy

RECYCLING

Al ritorno dalla passeggiata ecologica andiamo a buttare il vetro nella campana verde...

E quel contenitore giallo???
A cosa servirà???

Ma certo...è quello per mettere i vestiti che non usiamo più!!!!

Alessandro

27/03/2017

Many schools use recycled materials to make items and gifts.

Now we show some of those gifts and items.

In all classes there are baskets for separate collection, they are divided into 3 colors: green for the organic, yellow for the paper and blue for the plastic.

Deplastification

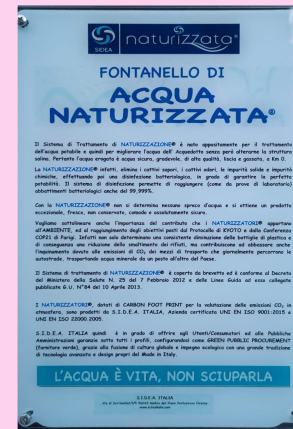

NO

YES

SAVE THE WATER!

In the towns where we live, we have available free water dispensers; in order not to pollute and not use too many plastic bottles.

THE WATER IS LIFE,
DON'T WASTE IT.

SLOW MOBILITY AND RESPECT FOR THE TERRITORY

IN VALTELLINA, THERE ARE CYCLABLE PATHS THAT CROSS THE VALLEY AND OUR COUNTRY. FROM HERE, YOU CAN ADMIRE THE WONDERFUL LANDSCAPE OF THE VALLEY. THERE ARE ALSO MANY ECO-SUSTAINABLE ACTIVITIES WITH BICYCLES OR SPORT ACTIVITIES.

THIS IS THE FITNESS PARK

THAT'S THE VALTELLINA PATH

THIS IS THE VALTELLINA PATH

THAT'S THE PUMP TRACK

To protect environment, some schools organize trees festival in which all children participate.

In many of our woods there are protected and beautiful trails open to all, for being outdoors

Renewable energy

Our school promotes some initiatives on renewable energy by explaining to children how they work and by going to visit them. There are three hydroelectric power plants around our country that you can visit.
